

# Rainwater Harvesting Workshop

**May 16, 8-4**  
**\$50\* Limited Space**

Come learn how to design and install your own rainwater harvesting system. This one-day workshop will focus on the basics of rainwater harvesting, centering around both active and passive methods of collecting rainwater in the desert. We will cover gravity feed systems, connections with pumps, irrigation system inter-tie and "best practices". Workshop includes a full day of learning, a tour of local Prescott sites, and discounts on parts and supplies.

**To Register please call 928.308.5992,  
or email [highdesertrain@gmail.com](mailto:highdesertrain@gmail.com)**

MacRae Nicoll, Contractor, Teacher & Owner of High Desert Rain Catchment has installed over 100,000 gallons of rainwater storage across Arizona. His design principles are centered around creating long term sustainable point-of-source production landscapes .
